Warehouse Management Systems

- ▶ Thanks to its flexible infrastructure and capability of integrating with ERP and commercial software, Fays Warehouse Management System puts enterprises **ahead of the competition**.
- ▶ As a result of increasing competition, enterprises have been endeavoring to lower their costs. Fays WMS **lowers costs**.
- ▶ Providing total control of warehouse operation process, **it eliminates** shipment and invoicing **errors** that user (warehouse operator) would otherwise do.
- ▶ It **increases productivity** in warehouse processes by means of RFID / Barcode technologies.
- ▶ It **ensures customer satisfaction** by providing a hassle-free warehousing and timely and error-free shipment.
- ▶ It **ensures total traceability** for warehouse inventories in the process from warehouse entry to shipment by means of entries from production or supplier, Shelve location, Serial / Lot, Manufacture date, Expiry date, Warranty date, Color, Type, Standard Barcode, Serial (Unique) Barcode generation capability.
- ▶ It **provides** monitoring and **control** over problems such as shortage, consumption, return and counting errors.
